ONYX 1L

white*

1L model is the smallest one in the collection of ONYX towel
dryers. It is ideal for compact bathrooms.

DIMENSION	320 x 600 x 8 mm
POWER	60-160 W
Voltage	230 V
Operating frequency	50 Hz
Protection degree	IP55
Operating temperature	40-60 °C
Control	Sensor
Off timer	3 hours
Holder	Stainless steel
Front surface	Tempered glass
Casing	Metal
Weight	4 kg

* Other color variants are possible

ONYX 2M

white*

2M model is perfect in its proportions. The size and power of the towel dryer allows you to use it also as a heating source for your bathroom.

DIMENSION	900 x 470 x 8 mm
-----------	------------------

POWER	125-350 W
-------	-----------

Voltage	230 V
Operating frequency	50 Hz
Protection degree	IP55
Operating temperature	40-60 °C
Control	Sensor
Off timer	3 hours
Holder	Stainless steel
Front surface	Tempered glass
Casing	Metal
Weight	8 kg

* Other color variants are possible

ONYX 3M

white*

3M model is the largest towel dryer in the ONYX collection. It is the most powerful and ideal for a spacious bathroom in a large house.

DIMENSION	1200 x 470 x 8 mm
-----------	-------------------

POWER	190-470 W
-------	-----------

Voltage	230 V
Operating frequency	50 Hz
Protection degree	IP55
Operating temperature	40-60 °C
Control	Sensor
Off timer	3 hours
Holder	Stainless steel
Front surface	Tempered glass
Casing	Metal
Weight	11 kg

* Other color variants are possible

Operating principle

ONYX glass towel dryer is a completely new product in the segment of towel warmers, manufactured by HYBRO.

Exept delicate drying of towels and other fabrics, ONYX serves as a valuable source of heat for the bathroom. It combines two types of heating – infrared and convection. The ONYX surface heats up to 60 degrees and works in the long-wave range of 7-14 μm . The even heating of it provides infrared heat flow, which is combined with convection formed between the wall and the back side of a towel dryer.

Construction

The ONYX towel dryer is made of tempered glass. This gives a special strength and unique appearance. Thanks to ultra-thin design, ONYX looks attractive, aesthetically pleasing and modern.

ONYX is a stylish, reliable and durable towel dryer. Its solidity guarantees the long operational term.

To create holders, which are made in a rectangular shape, the stainless steel profile is used. Geometric design is recognized in all HYBRO products.
